MIDUS 2: EF Effect Across Speci
NEGFW
NEGWF
POSFW
POSWF
Full covariate model with EF × Age interaction
No covariates (EF only)
All covariates except respondent demographics (age, gender, education)
Dual−earner subsample: EF × Spousal support moderation
Dual−earner subsample: EF × Gender moderation
Full covariate model with EF × Income interaction
Education−only SES indicator (income excluded)
Full covariate model with EF × Job Demands interaction
Full covariate model with EF × Family Demands interaction
All covariates except household variables (income, size)
Dual−earner subsample: EF × Coworker support moderation
Dual−earner subsample: main effects
Full covariate model with EF × Education interaction
Dual−earner subsample: EF × Supervisor support moderation
Demographic covariates only (no work or family demand variables)
All covariates except job demands and family demands
Specification
